

How are WCB industry premium rates set?

The Saskatchewan WCB sets industry premium rates annually. The rate setting process ensures today's employers pay for the cost of today's claims.

STEP 1: Industry Classification

- Employers are grouped into industry rate codes based on their primary business activity.
- This forms our classification system, which has 50 industry rate codes.
- The collective experience of all employers in each industry rate code determines the industry premium rate.
- All employers in the same rate code start with the same industry premium rate.

STEP 2: Industry Premium Rates

- An actuarial rate model is used to determine annual industry premium rates.
- Expected claims costs are projected for the upcoming year.
- Industry premium rate = costs/payroll.
- Premiums cover all current and future costs for claims that occur during the year.

STEP 3: Experience Rating

- The Experience Rating Program adjusts the industry premium rate based on your individual claims experience.
- Employers can receive a discount or pay a surcharge depending on their claims experience.
- Reducing the number and cost of claims through injury prevention and workplace safety can improve your experience rating and reduce the WCB premiums you pay.

The premium rate below is the industry premium rate per \$100 of assessable payroll.

In early December 2018, employers will be notified of their specific rate including experience rating.

Your 2019 premium rate is expected to decrease **6.3% from 2018.**

Rate Explanation:

The projected decrease in claims costs is the primary cause of the decrease in B13's industry premium rate.

B13 – Commercial, Industrial Construction

Factors	2018	2019	% Change
Claims Costs	\$1.233	\$1.125	
Administration	\$0.451	\$0.447	
Safety Association	\$0.224	\$0.222	
Base Rate	\$1.91	\$1.79	-6.3%
